

## Emotion Icons Design

In order to see the power of icons and how they relate to typography you will be creating 3 icons based on emotions. The emotions are:

1. Anger
2. Sadness
3. Joy

You will be required to:

1. Find an appropriate typeface that expresses the emotion and set in type the name of the emotion underneath the icon you create.
2. Create the icon. You will not be able to use a face of any kind. The purpose is to explore the elements of design ( line, shape, texture, value, space) and the principles of design (movement, balance, emphasis, and unity) to create icons that represent the emotions. Feel free to refer to the earlier lecture covering these principles. (<http://iws.ccccd.edu/acano/introdesign>)

What will be due on 10/16 will be 5 typeface choices for each emotion and 15 thumbnails exploring different design solutions for the icons.
